

Management Summary

Seven India-to-Australia product cases | Focus product: Little Millet (Kutki)

This report consolidates the cost and market evidence in the Manager Dashboard for a manager review of research progress. It is a snapshot of the source models and saved Australian retail observations, not a shipment approval or supplier quotation.

LITTLE MILLET COST AUD 2.625 per kg Base case	ECONOMIC TOTAL AUD 13,126 5,000 kg Sea LCL	MODEL CASH NEED AUD 14,149 includes model GST	NON-PRODUCT SHARE 39.6% of economic cost
--	---	--	---

What the current evidence indicates

- Costs vary by product and original scenario. Among the five products with both Base and High values, the modeled High case is 23.9% to 52.5% above Base. These are scenario assumptions, not confidence intervals.
- Little Millet Base includes material non-product spend. Goods account for 60.4% of modeled economic cost; freight and insurance, compliance and destination delivery make up the balance.
- Current retail references are AUD 5.99/kg. Two 1 kg Little Millet listings were saved on 4 October 2026. Their dehulling status is unconfirmed, so they do not establish like-for-like pricing or a margin.

Review context

MANAGER REVIEW Research covers: Kodo millet, Ragi, Bajra, Sorghum, Basmati rice, Red chilli powder and Little Millet, using each product's original form, order quantity, route and research date.

Evidence status: Landed-cost figures are indicative source-model outputs. Costs, GST treatment, classification, supplier specifications and route charges need confirmation with the relevant supplier, buyer, customs broker or forwarder.

Purpose: Review the interim research findings and evidence gaps. No procurement decision is requested in this report.

Seven-Product Cost Overview

Original modeled economic landed costs | AUD per kg

FIGURE 1 | Low / Base / High case comparison

Chart compares the source models as published. Product forms, order sizes and routes differ; compare each product with its own scenarios rather than using the bars as an opportunity ranking.

Product	Product form	Order / route	Research date	Low	Base	High	High vs Base
Kodo	Dehulled grain	5,000 kg Sea LCL	19 Sep 2026	Not available	2.391	Not available	Not available
Ragi	Whole grain	5,000 kg Sea LCL	13 Sep 2026	1.724	2.477	3.647	47.2%
Bajra	Whole raw grain	5,000 kg Sea LCL	03 Sep 2026	1.525	2.465	3.705	50.3%
Sorghum	Food-grade flour	20,000 kg Sea FCL	23 Aug 2026	1.426	Not available	1.906	Not available
Basmati	1121 steam milled rice	24,000 kg Sea FCL	06 Aug 2026	1.650	1.941	2.405	23.9%
Red chilli	Ground dried chilli	1,000 kg Sea LCL	31 Jul 2026	6.806	8.476	12.924	52.5%
Little millet	Dehulled grain	5,000 kg Sea LCL	04 Oct 2026	2.055	2.625	4.003	52.5%

READING THE RANGE Kodo has a Base case only. Sorghum has Low and High cases but no Base. Missing cases are left unavailable; no missing result is interpolated.

Finding: Available High cases exceed Base by 23.9% to 52.5% for Ragi, Bajra, Basmati, Red chilli and Little Millet.
Interpretation: Supplier pricing, freight, duty or local-charge assumptions can materially change the modeled unit cost.
Limitation: Different product specifications, shipment quantities and routes prevent direct commercial ranking.

Cost Drivers and Cash Requirement

Dehulled grain | Research date: 4 October 2026 | Costs are Indicative

FIGURE 2 | Economic cost composition

Finding: FOB goods are AUD 7,925.50 (60.4%); freight and insurance AUD 2,300.88 (17.5%); compliance AUD 800.00 (6.1%); destination and delivery AUD 2,100.00 (16.0%).
Interpretation: Destination, freight and border costs are meaningful quote targets in this model.
Limitation: The cost inputs are planning allowances rather than confirmed supplier, broker or forwarder quotations.
Source: v3 workbook, Manager Dashboard!A22:C27; Cost Evidence!G5:N22.

FIGURE 3 | Economic cost to model cash | AUD

Finding: Economic cost is AUD 13,126.38; modeled import GST is AUD 1,022.64; local-service GST and other cash difference are AUD 0.00 and AUD 0.00; modeled cash need is AUD 14,149.02.
Interpretation: The modeled cash requirement exceeds economic cost by the import GST amount.
Limitation: GST applicability, valuation and recoverability follow the source working case and require broker and tax confirmation. The chart's vertical scale begins at AUD 12,000 for legibility.
Source: v3 workbook, Manager Dashboard!N22:O27; Cost Evidence!G5:I22 and O5:Q22.

Transport Scenario Comparison

All three modeled alternatives use 5,000 kg; unit costs shown in AUD/kg

FIGURE 4 | Published economic cost by route

Route case	Quantity	Mode	Economic AUD/kg	Economic total AUD
5t Sea LCL	5,000 kg	Sea LCL	2.625	13,126.38
5t Sea FCL	5,000 kg	Sea FCL	3.379	16,895.13
5t Air	5,000 kg	Air	10.138	50,690.76

MODEL COMPARISON At this 5,000 kg volume, modeled FCL is 28.7% above LCL per kg; Air is 3.86x the LCL unit cost. The model economic totals are AUD 13,126.38 for LCL, AUD 16,895.13 for FCL and AUD 50,690.76 for Air.

Finding: LCL is AUD 2.625/kg; FCL AUD 3.379/kg; Air AUD 10.138/kg in the saved alternatives.
Interpretation: The modeled route assumptions show no cost advantage for FCL at the specified 5-ton order; Air is substantially more expensive.
Limitation: This compares source cases at one quantity. It does not represent live forwarder rates or a full-container utilization test.
Source: v3 workbook, Manager Dashboard!A45:E49; Cost Evidence!A30:J42. Little Millet FCL/Air insurance corrections are recorded in Cost Evidence!I31:I42.

Australian Retail Price References

Observed in the existing research on 4 October 2026 | AUD per kg

FIGURE 5 | Listed retail prices | same pack size

Retailer	Listing	Pack	Pack price	AUD/kg	Evidence date	Match note
Vel Spices	ICS Little Millet	1.0 kg	AUD 5.99	AUD 5.99	04 Oct 2026	Exact product; dehulling unconfirmed
Grocerz	Aachi Little Millet	1.0 kg	AUD 5.99	AUD 5.99	04 Oct 2026	Exact product; dehulling unconfirmed

COMPARABILITY Both saved listings are AUD 5.99 for 1 kg. Product identity matches Little Millet, while whether the products are dehulled is not confirmed from the listing evidence. Retail prices are not wholesale buyer quotes and should not be subtracted from landed cost to estimate margin.

Vel Spices | ICS Little Millet - <https://velspices.com.au/products/ics-little-millet-1kg>

Grocerz | Aachi Little Millet - <https://www.grocerz.com.au/product/aachi-little-millet-1kg>

Finding: Two Australian online listings provide a same-date 1 kg reference at AUD 5.99/kg.
Interpretation: The observations can guide further specification-matched buyer research.
Limitation: This is a two-listing snapshot, not a market average, wholesale price or time series; stock and prices can change.

Definitions used in this report

Term	Meaning
Economic landed cost	Modeled product and shipment costs through the illustrative warehouse, excluding GST that the source separates as potentially recoverable.
Model cash need	Source-model initial cash outlay, including the modeled GST treatment; it is not a payment calendar.
FOB	Free On Board goods value used as the product-cost component in the source model.
LCL / FCL	Less than Container Load / Full Container Load sea freight.
GST	Goods and Services Tax. The report reflects the working assumptions in the product models, not a tax ruling.
Indicative	Planning estimate or saved public reference, not a confirmed supplier, buyer, broker or forwarder commitment.

Open evidence gaps

LIMITATIONS Supplier processing capability, final product specification, MOQ, certifications and batch COAs need written confirmation. Exact biosecurity pathway and commodity viability depend on species, processing and intended use. Tariff classification, preferential treatment, duty, GST applicability and recovery need customs and tax confirmation. Freight, origin charges, inspection, destination handling, broker fees and warehouse delivery remain model allowances pending route-specific quotations. Retail references require a dehulled-specification match before commercial comparison.

All cited cost figures are from the source models consolidated in the Manager Dashboard; the underlying model inputs retain their original assumptions and dates. Needs confirmation from customs broker / buyer / forwarder.
